9	0.00	39.58

Condition number 39.58

Eigenvalues & condition Index computed from the scaled raw sscp with an intercept.

Det(correlation matrix) 0.34

¹ A general rule of thumb: A serious multicollinearity problem is suspected if the mean of all the variance inflation factors is considerably larger than 10, if R² is greater than 0.80, or if condition number (that is derived from the eigenvalue) exceeds 1000.
